SPECIFICATIONS FOR GANG MOWERS...

● These specifications are meant to describe a 5 Unit Gang Lawn Mower for use with various kinds of animals:

HITCH: The Hitch shall be of the draw type built of Mahogany and suitable for use with Ostriches, Zebras, Giraffes or Dik-Diks. It shall be equipped with a comfortable Simian type seat. Wheels will be of lignumvitae, properly pegged.

SICKLE BAR: To be strongly constructed of 3-inch Bamboo. Guards to be built of strong durable Water Buffalo Horns. Simple manual thong lift for small operator.

GANG MOWERS: There shall be at least five 30-inch heavy-duty mowers, each mower to be mounted on 2½" teakwood wheels with cypress pegs and pins and five sharp split cane blades. Rear roller to be 4-inch Bamboo sticks. Must cut all prevailing types of African swamp bunch and plains grass once over.

DESTINATION: Delivery F. O. B. Timbuctoo — Subject to A-1 Priority.
